

UNIVERSITY INNOVATION CLUSTER – BIOTECHNOLOGY (UIC - B)

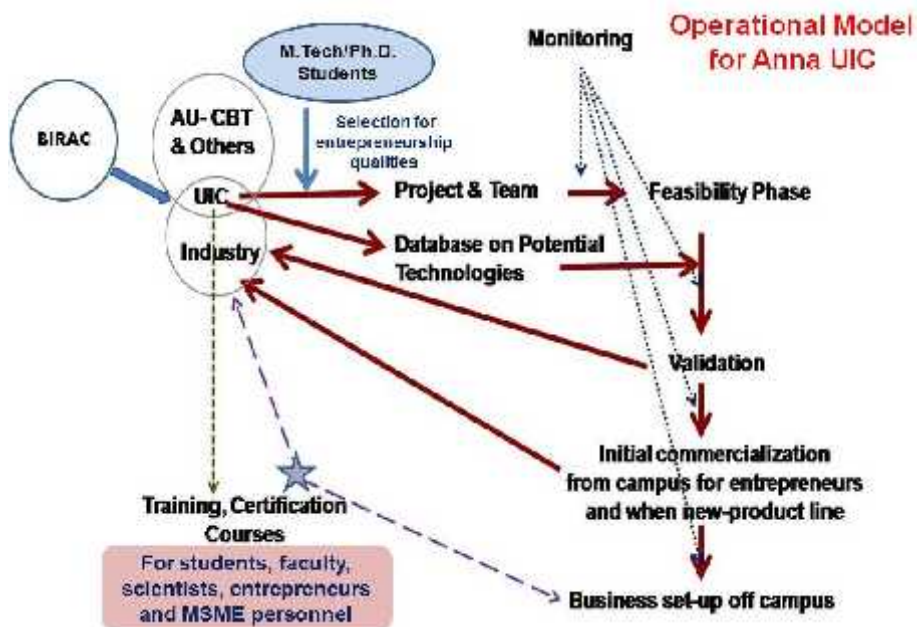

About Us:

University Innovation Cluster (UIC) has been funded by **Biotechnology Innovation Research and Assistance Council (BIRAC)**. This council has developed a focused strategic action plan to foster the culture of innovation and techno – entrepreneurship in Universities.

UIC has been developed to nurture a culture of applied research and need – oriented (societal or industry) innovation among researchers. This includes stakeholders in the entire value chain from idea discovery to proof-of-concept to prototype development/pilot studies to validation and commercialization. We are a facilitator to fund and foster innovations, such support will include Technical infrastructure, Technology trainings, IP management, Technology business management, access to Venture Capital finance for setting up the industry.

Aim:

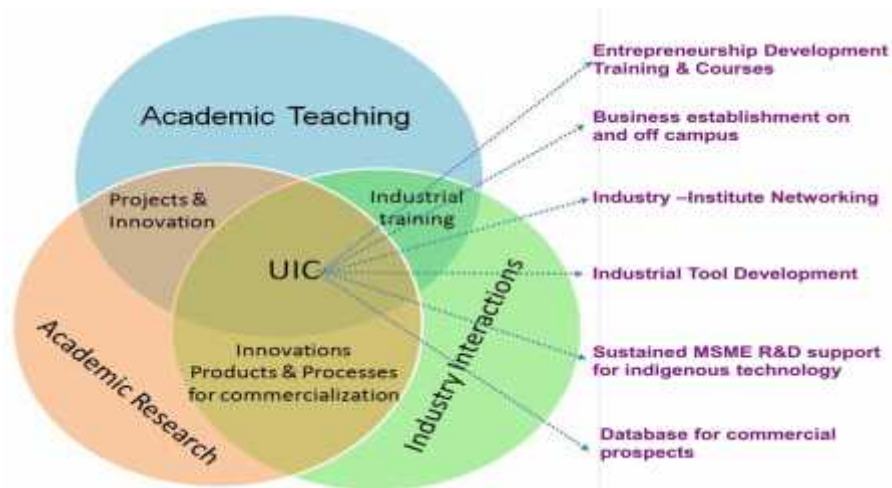

To help Entrepreneurs set up their business off- campus

UIC Focus Area:

Areas of Biotechnology (Except Agriculture & Veterinary Science)

UIC Activities

Facilities available

- High end infrastructure in the above prescribed fields including pilot bioreactor, platform for diagnostic kit development etc.,
- Laboratory workspace and all administrative support such as internet, library, secretarial assistance, IPR cell, Technology transfer cell etc.,
- Dedicated mentors for the guidance of Innovation fellows from both academia and industry

Scope of UIC – B

- Search for innovators on all – India basis and groom them with education, funding and project development by associating with matching academic partnership in the region.
- Potential technologies in the University shall be identified and be developed to commercialization stage and enterprise will be created.
- Creation of platform tools for industrial Research and development
- Identified projects with pilot processes or prototypes shall be shortlisted, mentored and funded through BIRAC in a mode agreeable to the industry and academic partners.
- MSMEs requiring product development to establish businesses will be served with Research and Development and consultancy for establishing their business.
